JOLLY RANCHER REMIX

HERSHEY, PENNSYLVANIA

Jolly Rancher Remix is a thrilling re-themed rollercoaster at Hersheypark that features a revamped audio and lighting experience, designed to transport riders to a magical candy wonderland.

The new audio experience will feature lively tunes inspired by popular Jolly Rancher flavors, such as cherry, watermelon, blue raspberry, and green apple.

WEST SHORE THEATRE

NEW CUMBERLAND, PENNSYLVANIA

West Shore Theatre has been completely transformed from a 1940s movie house to a flexible event space.

Design efforts ranged from restoring the skin of the building to making ADA accessibility upgrades to the more unique idea of creating an easily staffed concessions stand that is unapologetically modern and open to the historic house.

PENN STATE HEALTH MILTON S. HERSHEY
MEDICAL CENTER
HERSHEY, PENNSYLVANIA

Illuminated Integration designed and installed new exterior facade lighting for Penn State Health Milton S. Hershey Medical Center in Hershey, PA. The new lighting fixtures are color-tunable which allows various seasonal/holiday themes. These fixtures are paired with a DMX based lighting control system which allows the Medical Center to use the facade lighting as a backdrop to holiday productions which take place on the lawn. A mixture of SGM Lighting P6 and P2 fixtures were used to create the iconic illumination of the crescent facade.

SERVICE FIRST

DANVILLE, PENNSYLVANIA

Illuminated Integration installed a audio and conference video system in Service First's Corporate Conference Room. Our Integrations Team set up a system controlled by a mounted touchscreen, or portable iPad to control the conferencing camera, televisions, phone system, and audio capabilities.

MEMBERS 1ST

ENOLA, PENNSYLVANIA

Illuminated Integration designed, installed, and programmed a complete corporate media studio for Members 1st Federal Credit Union. The new studio space was designed to accommodate product marketing video shoots which include product training videos, testimonial videos, and corporate presentations. These presentations can be both streamed and recorded using the designed systems.

The design included the following components: Studio lighting, mobile display monitors, video camera and dolly, streaming equipment, microphones, a motorized backdrop roller system, studio pipe grid rigging, and acoustics.

OXFORD AREA HIGH SCHOOL

OXFORD, PENNSYLVANIA

Illuminated Integration installed a complete LED theatrical lighting system for Oxford Area High School's Auditorium. The existing incandescent ellipsoidal fixtures were retrofitted with new LED sources. New color changing wash fixtures were installed over the stage. The ETC control system was upgraded to provide simple control and advanced control from both wall mounted touchscreens and a theatrical lighting console.

Lighting

TOWSON ANIMAL DENTAL

TOWSON, MARYLAND

Illuminated Integration provided and installed an AVoIP, audio, video, and control system in various capacities in the following rooms:

Waiting Room | Conference Room | Locker Space | Office | Studio | IT AV Rack
Lactation Room | Classroom | Break room | Restrooms | Training Room

Wireless Networking and Network Switches were also provided by Illuminated.

Animal Dental Center
Veterinary Dentistry and Oral Surgery Specialists

OTTERBEIN COMMUNITY CHURCH

WAYNESBORO, PA

Illuminated Integration designed and installed audio, video, lighting, rigging, and curtain systems to convert a gymnasium into a modern sanctuary. Otterbein's leadership wanted to create a welcoming worship center that met their mission to reach across generational lines both locally and through online ministry.

SHELTER ROCK UUC

MANHASSET, NEW YORK

The AV and lighting system upgrade at the Unitarian Universalist Congregation at Shelter Rock has enhanced their worship services and events. The installation of PTZ cameras, LED walls, video monitors, and a robust video switching system has improved the congregation's visual experience, whether attending in person or remotely. The addition of advanced stage lighting provides an immersive and dynamic atmosphere during worship services and performances. The Atlona Velocity System ensures seamless AV control, making it easy for staff to manage the entire system effortlessly. The Unitarian Universalist Congregation now has a state-of-the-art AV and lighting setup that enriches the worship experience and accommodates a wide range of events and presentations.

PA BIBLE TEACHING FELLOWSHIP

LEMOYNE, PENNSYLVANIA

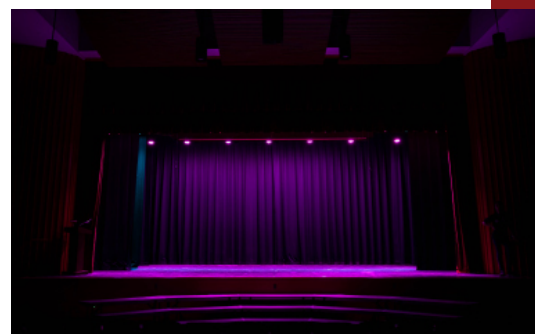

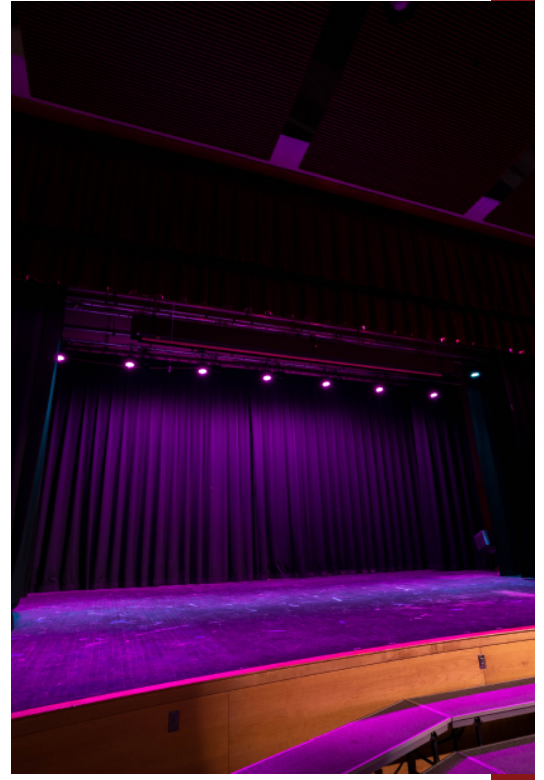

PA Bible Teaching Fellowship in Lemoyne, PA received an upgraded Audio system for better sound and intelligibility. Illuminated Integration designed the system to keep sound energy off the walls while equally covering the congregation preventing excessive audio reflections in their reverberant sanctuary. PA Bible also received new piano microphones, discrete congregational microphones to capture the in room experience for their live stream, and a new digital mixing console that is both volunteer friendly and flexible for the future growth of their music and technology teams.

Audio

PENN'S GROVE MIDDLE SCHOOL AUDITORIUM OXFORD, PENNSYLVANIA

Illuminated Integration designed and installed an upgraded lighting system in the Penn's Grove Middle School Auditorium, located in Oxford, PA.

The stage lighting was upgraded with ETC Source 4WRD II fixtures and ETC ColorSource PAR fixtures. An ETC Element 2 lighting console was specified because of its advanced theatrical color control capability and its magic sheet feature. For architectural control, an ETC Paradigm system was specified which interfaces with button stations and touchscreens around the space. The lighting rig was designed to accommodate any event that is held on the stage from school assemblies, choir concerts, to a musical!

Many of the existing house lights were in need of repair resulting in dark spots throughout the auditorium. CantoUSA's retrofit kit lamps allowed Illuminated to upgrade the entire house lighting system, while limiting the amount of fixtures that needed to be completely replaced. The CantoUSA lamps dim smoothly and output a warm 3000K color temperature.

For visionary clients seeking to transform spaces into captivating and immersive environments, Illuminated Integration is the premier partner that seamlessly blends cutting edge technology with artistic mastery. With a passion for innovation and a commitment to customized solutions, we empower our clients to ignite emotions, engage audiences, and leave lasting impressions.
